

## SOFTPHONE FOR BUSINESS

The vPBX Softphone allows you to make work phone calls over the internet via your computer, tablet or smartphone, with all the high end features of a desk phone. With all the functionality you're familiar with - transferring calls, hold, multiple lines and voicemail - it also features powerful new additions like presence, the ability to transfer calls to a colleague at home or even in a different city, and notifications about incoming calls with rich information about the caller. You can also access a shared company contact directory.

- ✓ **Take your work phone with you wherever you go.**
- ✓ **Make high quality calls over your shared company system.**
- ✓ **Mimics the functionality of a desk phone on your screen.**
- ✓ **Shared company contact directory.**

## FEATURES

An important advantage of softphones is that they empower your team with all the expected tools of a modern workplace. Technology is advancing rapidly. And our expectations as consumers is that we should be able to access everything at our fingertips from the convenience of our smartphones. Your employees of all ages are most likely expecting more from their workplace and want a solution that allows them flexibility in the way they communicate with each other and with clients.

Some of the key features that your team will love about the vPBX Softphone are:

**HOLD CALLS:** Put calls on hold & transfer just like you would on your desk phone.

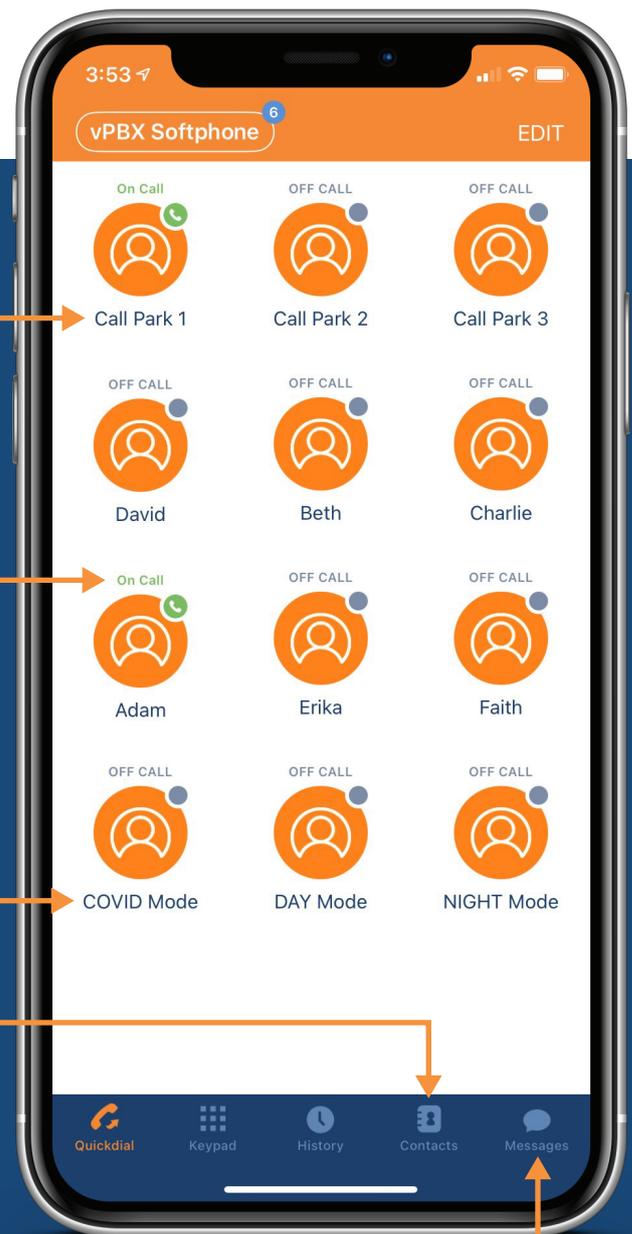

**VOICEMAIL:** An audio file of your voicemail can be pushed to your email or mobile.

**PRESENCE:** See when your team is online, as well as when they are busy or in a meeting. For example in this image Park 1 & Adam are "On Call" showing their presence as green.

**CALL HANDLING MODES:** These 3 buttons note traditional telephone features such as Day/Night mode & Covid mode. The mode determines how the incoming call is handled.

**SHARED CONTACT LISTS:** Subscribe to a company contact list, or share your contacts with coworkers.

**INSTANT MESSAGING:** Team communication is all within the app making it easy to find, search & collaborate.
